

Thank you for purchasing the Fairlight III VST instrument. The Fairlight III VST is divided into 5 VSTs covering the various sections of sounds that this beast offers. They are available individually or as a complete set.

The mid to late 80s brought us the Fairlight CMI III. A huge improvement in sonic quality as this gem gave you 16bit sampling, with a whopping 14mb of RAM, increasing the sample time up to 3 minutes in length. This instrument offers many of the disks from the Fairlight CMI III.

With the usual nice & easy to use GUI, you can add some soaring horns, brass ensembles that slice through the mix, dreamy bells & beautiful choirs to your productions.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically be integrated within your setup.

This instrument is now VST 2 & 3 ready and available for Mac users.

Here is a short video showing how to get up & running quickly...

<https://youtu.be/wiTSdVzNKtg>

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to retrobeat1985@gmail.com or find us on YouTube & Facebook as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*

BRASS PATCH LIST

Bass Trombone	Scream Trumpet
Bass Trumpet	Tenor Trombone
Brass 1	Tenor Tuba
Brass 2	Trumpet
