

Thank you for purchasing this Ronald D5 Bank A VST instrument.

We took in a Roland D5 and sampled every sound of the Performance Banks. The VST comes in 2 parts, Bank A and Bank B. All of the sounds have been multisampled and some are velocity layered.

The D5 is basically a D10 but without effects. It's a very underestimated synth with many highly useable sounds.

You can manipulate the sound envelope, add reverb, pitch and pan. You can modulate the LFO too. I have also added the ability to switch between Polyphonic and Monophonic with the addition of a portamento glide function. Many of the above features aren't available on the D5 so it adds even more creativity to your productions.

**NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.**

**To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically ask for your serial and be integrated within your setup.**

**For Logic and Sierra users, please see the installation instructions which can be found on the VST instruments page of the Beat Machine website. This is Catalina compatible.**

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to [info@beatmachine.co.uk](mailto:info@beatmachine.co.uk) or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*

## PATCH LIST

- ✓ A11 Hyper Ensemble
- A12 Sweet Memories
- A13 Flamenco Guitar
- A14 Piano Etude
