

Thank you for purchasing this Ronald D5 Bank B VST instrument.

We took in a Roland D5 and sampled every sound of the Performance Banks. The VST comes in 2 parts, Bank A and Bank B. All of the sounds have been multisampled and some are velocity layered.

The D5 is basically a D10 but without effects. It's a very underestimated synth with many highly useable sounds.

You can manipulate the sound envelope, add reverb, pitch and pan. You can modulate the LFO too. I have also added the ability to switch between Polyphonic and Monophonic with the addition of a portamento glide function. Many of the above features aren't available on the D5 so it adds even more creativity to your productions.

NOTE: Please place the included fonts into you 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. When you then start your DAW, it will automatically ask for your serial and be integrated within your setup.

For Logic and Sierra users, please see the installation instructions which can be found on the VST instruments page of the Beat Machine website. This is Catalina compatible.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

*Finally, may we ask you to **please not illegally share, duplicate or modify** this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.*

PATCH LIST
